

THOMAS J. WATSON FELLOWSHIP

Fellowship Advising and Study Abroad Office (FASA)

Caltech

Overview/Synopsis & Eligibility

- Candidates must devise their own study program. This independent study program should provide substantial contact with another culture or cultures. This year should not involve extended foreign study at a university. Rather, the applicant's proposal should be one that fosters independence and be of personal significance.
- Applicants may be **U.S. citizens, permanent residents, or foreign nationals.**
- Applicants must be graduating seniors attending one of the approximately forty colleges whose students may apply for a Watson, including Caltech. However, the application process will begin your junior year.
- No specific grade point, language skill or specific major is required, applicants must be able to develop a creative, interesting, and feasible proposal for a year of independent “study” and travel.
- Each year, about 41 students are selected nationally as Watson Fellows and awarded \$36,000 to travel world and pursue their project.

WHY APPLY?

Adventure

Enthusiasm

Discovery

Selection Criteria

Qualities sought in the selection of fellows include:

- Leadership
- Imagination
- Independence
- Emotional Maturity
 - Courage
 - Integrity
- Resourcefulness
- Responsibility

Application Components and Deadlines

"MEET" WITH ME TO DISCUSS BY April 15th

Application forms (3 pages)

1500-word personal statement

1500-word proposal

2-3 letters of reference using Watson form (at least 1 needs to be from someone at Caltech, typically faculty)

Proposed budget breakdown and contact list (Note: stipend is taxable, may use stipend to pay taxes)

Transcript (Unofficial OK)

DEADLINE: April 19th by 5pm PST

Everything emailed together to SAapplications@caltech.edu Recommenders email their reference forms to

SAreferences@caltech.edu

Qualities for Composing a Successful Proposal

- What they are looking for in the project and personal essays:
 1. Passion
 2. Vision
 3. Intention
 4. Independence
 5. Resourcefulness & Courage
 6. Feasibility, Sustainability
 7. Stretch
 8. Fit
 9. Person ⇔ Project

Please Note:

- Remember, at least one of the recommendations needs to be from someone at Caltech, typically a faculty member. And they email their reference to us directly.
- The rules are that you must select countries ranked 1 or 2 while avoiding countries ranked 3 or 4 on the US Department of State Travel Advisory site. However, with COVID-19, many countries that are normally safe and ranked 1 or 2, are now ranked as 3's. For example, the UK, France, Germany, etc. So, they are being lenient with the ranking, but make sure you pay serious consideration to safety and accessibility with the countries you select.
- Normally winners are required to begin their travel the summer they are selected, however they have recently been flexible and offering deferment until it is safe to start your project.
- Safety is a key priority for the Watson Fellowship, so although there are many uncertainties, this is always their most important consideration.

Liana Merk, Bioengineering '21
"Cultures Across Cultures"

*Iceland, Greece, Inner-Mongolia/China,
Japan, Ireland, & Switzerland*

► Merk's project takes her around the world to sequence and study the DNA of bacterial cultures within local yogurts. Many different countries have some form of fermented milk similar to yogurt, but the fermentation processes vary widely, along with the types of microbes that produce the product. Merk is looking for genetic signatures that indicate how strains of bacteria have traveled and evolved across cultures.

► *"Invented almost 8000 years ago, yogurt has embedded itself across cultures, with communities developing their own ways of making, propagating, and sharing it. By living with dairy farmers, hearing deep-rooted family traditions, and sequencing microbes from local yogurts, I will learn how yogurt affects both bacterial diversity and diversity of thought."*

Liana's Culture Quest *Currently*

My ability to travel across borders is highly dependent on COVID restrictions, so there will certainly be changes as my journey progresses. For now, here's my plan:

December: Toulouse, France

January: Rishikesh, India

February: Singapore (here now!)

March - Mid April: Limerick, Ireland / Vitoria or São Paulo, Brazil

Mid April - end of May: Nagoaka, Japan

June: Athens, Greece

July - Mid August: Zürich, Switzerland

I would recommend as daunting as the process seems, just start now. Finding open doors will take time, and those will fuel your excitement to keep creating your project. The application has a personal statement and proposal component. I would recommend going through at least a few rounds of editing on these, and it will help your recommenders immensely if they can at least see a rough copy of these, so they can write better recommendations. So aim to have a draft by beginning of March, meaning you have about a month and a half to create an idea and get at least a few contacts.

FAQs and Open Questions

1. How to approach drafting your idea: advice on how to get started?
2. Recommendations on selecting countries? (Highlight how picking places that best fit and work for the project, etc.)
3. Advice on working w/ contacts, finding opportunities and people to work with.
4. Tips for picking recommenders?
5. What are some general tips to consider for a successful application? (Thinking of your audience, taking time, etc.)

Here to help!

Meghan Kuroda, Caltech Watson Advisor:

mkuroda@caltech.edu

Available for emails, Zoom, or in person meetings. Office library open 8-5 pm M-F (Office closed for 12-1 lunch hour)
